

Associate Director, Global Safety and Environmental (Alcon, Inc. - Fort Worth, TX)

Basic Function:

Accountable for implementing company Global Safety and Environmental Vision and developing a business specific roadmap for achieving this vision. Responsible for the development and roll-out of global policies/programs and enhancing management systems and auditing programs to ensure manufacturing facilities and affiliates are in compliance with local, state, federal and country regulatory mandates. Proactively analyzes the direction of global safety and environmental regulatory requirements to maintain compliance and ensure the viability of each facility to support the business direction. Works to ensure that the company is viewed as a positive community citizen while providing a safe work environment for employees and developing a sustainable safety business plan.

The opening is located at the Alcon Division Health, Safety and Environment Department at our global Headquarters based in Fort Worth, Texas. For more information contact David Smat at david.smat@alconlabs.com.

Minimum Education Requirements:

BS or BA in Engineering, Safety or Environmental Sciences, Chemistry, or related science with knowledge in engineering, science principles and regulations. Preferred: Masters in related science and safety/environmental compliance background.

Minimum Experience Requirements:

15 plus years within industry, preferably in multi-site manufacturing operations with primary responsibility for safety and/or environmental compliance. Regulatory agency experience in combination with industry work may also be accepted. Five years in management.
