**Closing Date:**

Until Filled

**General notes:**

TITAN Engineering, Inc. is a full-service environmental engineering, consulting, and Management Company established in 1999. The company is headquartered in Frisco, Texas and operates seven other offices in Texas (Southlake, Fort Worth, Austin, San Antonio, North Houston area, South Houston area, Amarillo). TITAN provides assistance to the private manufacturing sector by securing state and federal environmental permits, filing the required state and federal environmental reports, developing and managing environmental compliance programs, constructing waste management units and remedial systems, providing strategic planning and management services, and assessing, remediating, and closing contaminated properties. TITAN also assists the legal, insurance, and financial communities in the evaluation of environmental risk and provides third party project oversight to protect client interests. In addition, TITAN also provides services outside the environmental realm, such as construction project management/oversight, commercial/industrial property demolition, and development of spring sites as water supply sources.

TITAN's staff is comprised of both senior and junior-level professionals, including registered professional engineers, geologists, hydrogeologists, and other scientists. This professional diversity allows TITAN to fully staff projects, providing the exact expertise where required to effectively address and manage client projects.

TITAN focuses on establishing long-term client relationships built on service excellence, work quality, consulting value, integrity, and trust. TITAN's technical capabilities, in conjunction with its abilities to plan, execute, and manage projects on a turn-key basis, position TITAN as a leader in the environmental consulting marketplace.
